SAPPHIRE Lite Online

RS232 & RS485 Tank Gauge Interface

3G Enabled — Automated Once-a-Day Transaction Synchronisations via 3G Technology

2 Pump Upgrade Available

FEATURES AND BENEFITS

Track every litre of fuel or fluid dispensed with the Sapphire Lite Online terminal, the next generation of entry level Fuel Management terminals, utilising Contactless technology and automated transaction synchronisation via 3G for secure and controlled fuelling.

The Lite solution provides cost effective Fuel Management with vehicle/driver and stock reporting via the secure MCS Connect website.

Our MCS Connect website is a money saving business tool providing user friendly reporting and reconciliation.

Access MCS Connect from any web enabled PC, tablet or smartphone eliminating the requirement for software installed on only one PC. Unlimited users have access to the MCS Connect website and complete control of who can access and modify transaction and stock data.

SAPPHIRE LITE ONLINE OFFERS

- Secure contactless technology to track every litre.
- Automated transaction uploads via 3G technology ideal for unmanned sites
- Choose the time at which your once-a-day transaction upload is carried out removing the need to visit the terminal
